

Technology

The supraGuide^{eco} is an audio guide for all groups of visitors – small, convenient and economical. It is optimized for use in museums and tourist attractions with a large and diverse audience. This classic audio guide offers excellent sound quality, intuitive handling and a long working life.

The slender design means it rests comfortably in the hand and is especially user-friendly for visually-impaired visitors. Our energy-saving hardware and software architecture makes it highly efficient in electricity use.

Key features in brief

- ✓ for indoor and outdoor use
- ✓ lightweight and ergonomic
- ✓ rugged and reliable
- ✓ multi-language display
- ✓ keypad and high-contrast display increase accessibility
- ✓ optimal sound transmission with built-in loudspeaker
