

supraGuide **TOUCH**

Mediaguide for
videos and maps

Technology

tonwelt's new supraGuideTOUCH alerts your visitors to the special details of your exhibits and presents them vividly in a multitude of languages on the large color display using audio clips, engrossing films, pictures and maps. Additionally you can make a selection of exhibits to offer special thematic tours.

The indoor positioning system informs users about their location in the museum at any time. A special technology linking the supraGuideTOUCH devices enables group tours to be carried out in a range of languages.

Key features in brief

- for indoor and outdoor use
- reliable and robust
- lightweight and ergonomic
- multi-language display
- high-contrast and color display suitable for daylight use
- navigation using number input or floor plans
